A NEW SPACE FOR GROWTH: WE'VE MOVED!

We are pleased to announce that CoreTech Singapore has officially relocated to a new and expanded office space! This move reflects our continued growth and commitment to serving our customers better.

Our new address is: 150 Kampong Ampat, #07-01 Singapore 368324

We are deeply grateful to our important guests from abroad who made the journey to Singapore to join us for our new office opening ceremony. Your presence meant the world to us and made the day truly memorable.

This event was not just a celebration of our new space, but also a celebration of the strong, long-standing relationships we have built over the years.

We look forward to many more years of collaboration and mutual growth. Thank you once again for your support and for being part of this significant milestone in CoreTech's journey.

 A LEARNING JOURNEY TO THE UNITED STATES

Earlier this July, I travelled to the United States to visit RheoSense, one of our new suppliers of advanced viscometry solutions.

Our Director, **Louis Chan**, joined me on this visit, where we had the privilege of meeting **Dr. Baek Seong Gi**, CEO of RheoSense, and his technical team. The trip provided a valuable opportunity to strengthen our partnership and gain a deeper understanding of RheoSense's technologies and products.

OUR DIRECTOR LOUIS CHAN AND DR. BAEK SEONG GI
AT RHEOSENSE INC USA

During the visit, I received comprehensive hands-on training covering equipment operation, maintenance, calibration, and troubleshooting. I also learned how RheoSense instruments are applied across various industries and under different operating conditions.

The knowledge and experience gained from this training will directly benefit our customers. I am now better equipped to diagnose and resolve technical issues, provide more effective product support, and deliver practical solutions tailored to customers' operational needs.

I would like to express my sincere appreciation to the management for entrusting me with this valuable opportunity, and to Dr. Baek and the RheoSense team for their warm hospitality and comprehensive training.

CONGRATULATIONS TO RHEOSENSE

We'd like to extend our warmest congratulations to **RheoSense, Inc.**, who has been awarded ISO 9001:2015 certification, issued by TÜV SÜD America Inc.

The certification covers their San Ramon, California facility and the design, assembly, and testing of their viscometers and VROC® chips.

This internationally recognised certification affirms their commitment to rigorous quality management across all operations.

The ISO 9001:2015 standard establishes a framework for consistent process control, continual improvement, and customer-focused quality assurance – providing scientists, researchers, and regulatory professionals with confidence in the precision and reliability of RheoSense instrumentation.

About RheoSense Viscometers

RheoSense's VROC®-powered viscometers require very small sample volume and deliver reliable, repeatable measurements – and as their Singapore partner, we provide local sales and servicing support.

If you'd like to learn more, feel free to reach out to our team.
